

Brainstorming & Idea Prioritization Template

Date	06 July 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Siri Putta (Team Lead)	Develop a core machine learning classification model (Decision Tree, Random Forest, KNN, XGBoost) to predict whether a loan applicant is likely to repay or default, based on income, credit history, and employment details.	Core Development	1
2	Apurupa Ande	Design an intuitive Flask-based web interface where bank credit officers can enter applicant details and instantly view the loan approval prediction.	User Interface / Application	2
3	Asritha Vadranam	Implement an automated risk-flagging feature that highlights high-risk applicants (irregular self-employment income, no credit history) for further scrutiny or document verification.	Analytics / Features	3
4	Jaswanthi Salluri	Perform exploratory data analysis and compare Decision Tree, Random Forest, KNN, and XGBoost models on accuracy, precision, and recall to select the best-performing model for deployment.	Data Analysis	4
5	Murikipudi Sai Poojitha	Enable batch evaluation of multiple loan applications so financial analysts can process high volumes quickly, with the trained model deployed on IBM Cloud.	Integration / Deployment	5

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Fi

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Core ML Classification Model for Loan Prediction	High	High	High	Yes
2	Flask Web Interface for Real-Time Prediction	High	High	High	Yes
3	Automated Risk-Flagging & Batch Evaluation Analytics	Medium	Medium	Medium	No
