Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Discovering Smart Lender	Stage 2: Filling the Prediction Form	Stage 3: Viewing the Result
Actions <i>What does the customer do?</i>	- Visits the Smart Lender home page to learn what the platform does. - Reads the feature highlights and "98% Prediction Accuracy" stat on the landing page. - Clicks the "Start Loan Prediction" button to move to the form.	- Fills in personal details (Gender, Married, Dependents, Education) and financial details (Income, Loan Amount, Loan Term). - Selects Credit History and Property Area, then clicks "Predict Loan Status." - Double-checks the entered numbers before submitting.	- Waits briefly for the result page and reads the loan approval/rejection message. - Decides whether to go back and adjust details, or proceed with the actual bank. - Clicks "Back to Home" to restart if unsatisfied with the outcome.
Touchpoint <i>What part of the service do they interact with?</i>	- Home page (home.html) content and design. "Start Loan Prediction" call-to-action button. - Overall visual branding and feature/stat cards.	- Loan Prediction form page (predict.html). - Dropdowns and numeric input fields on the form. "Predict Loan Status" submit button.	- Prediction Result page (submit.html). - The result message (e.g. "Loan Will be Approved"). "Back to Home" button.
Customer Thought <i>What is the customer thinking?</i>	"Is this tool reliable enough to trust with my loan decision?" "This looks quicker than booking a bank appointment." "What information will I actually need to provide?"	"I hope I'm selecting the right value for each dropdown." "Will a small mistake here change my result?" "This is faster than filling out paper bank forms."	"Is this the final decision, or just an estimate?" "What can I do next if the loan wasn't approved?" "Should I try adjusting my details, or contact the bank directly?"
Customer Feeling <i>What is the customer feeling?</i>	Curious, but a little skeptical about an AI-based decision.	- Slightly confused by the coded dropdown values. - Focused while carefully	- Relieved if approved, disappointed if not. - Uncertain about what

	- Encouraged by the accuracy statistic shown on the home page. - Hopeful about getting a fast decision.	checking each entry. A little anxious just before hitting submit.	the next real-world step should be. Satisfied overall with how quick the process was.
Process Ownership <i>Who is in the lead on this?</i>	Frontend/UI team - owns the home page content and design.	Backend/Flask developer - owns the form and the /submit route.	ML team & backend developer - own the model's prediction logic and the result page.
Opportunities <i>How can we improve this stage?</i>	- Add a short "How it works" section or demo walkthrough. - Clarify what applicant data is used and how it's kept secure. - Add short testimonials or sample use-cases to build trust.	- Add inline field validation with helper text for each input. - Replace raw numeric codes with clear, human-readable labels. - Group fields into steps (personal info vs. financial info) with a progress indicator.	- Show a confidence score instead of a plain Yes/No result. - Give guidance/next steps for both approved and rejected outcomes. - Log outcomes to support future model retraining and analytics.
