

Demonstration of Proposed Features

Date	06 July 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Home page	Developed an attractive and responsive home page providing project overview and navigation to all modules	Implemented	Yes	Home page demonstrated successfully with smooth navigation.
2	Loan Approval Prediction	Predicts whether a loan application will be approved or rejected using the trained Random Forest machine learning model.	Implemented	Yes	Loan prediction generated accurately based on applicant details.
3	Performance Analysis	Displays the performance and accuracy comparison of Decision Tree, Random Forest, KNN, and Gradient Boosting algorithms	Implemented	Yes	Model performance demonstrated successfully with accuracy comparison.
4	Financial Tips & Workflow	Provides loan approval tips and explains the complete workflow of the prediction system from data collection to prediction.	Implemented	Yes	Tips and workflow pages demonstrated successfully.
5	Flask Web Application	Developed a user-friendly Flask web application integrating the trained machine learning model with the HTML, CSS, and Python backend.	Implemented	Yes	Application demonstrated successfully through web interface.
6	Online Deployment	Deployed the application on the Render cloud platform for online access.	Implemented	Yes	Live application demonstrated using the Render deployment link.

Feature Implementation Summary:

Total Features Proposed	Details
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
