

Project Demo Planning

Date	06 July 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the Smart Lender project, explain the motivation, objectives, and challenges	2	Team Lead
2	Dataset & System Architecture	Explain the loan_prediction dataset, data preprocessing, feature engineering, system architecture, and overall project workflow.	3	Member 1
3	Machine Learning Model	Describe the machine learning algorithms used (Decision Tree, Random Forest, KNN, Gradient Boosting), model training process, evaluation metrics, and why Random Forest was selected.	3	Member 2
4	Live Application Demonstration	Demonstrate the Home page, About page, Performance page, Tips page, Workflow page, Prediction page, Contact page, and show the loan prediction process using sample applicant details.	5	Member 3
5	Deployment & Project Features	Demonstrate the deployed Render application, GitHub repository, project documentation, and explain the technologies used.	2	Team Lead
6	Conclusion & Future Enhancements	Summarize the project outcomes, advantages, limitations, and future scope.	2	Member 4

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly explain the purpose and objectives of the project.
2	Solution Overview	Present the system architecture, technologies used, and workflow.
3	Live Feature Demonstration	Demonstrate all application pages including Home, About, Performance, Tips, Workflow, Contact, Prediction, and display the final loan approval or rejection result using the deployed application.
4	Q&A Session	Answer questions from the evaluators and explain implementation details.
